**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (US Pat. 4,840,269).

See the attached marked up drawing figures 1 and 3 of Anderson depicting the claimed features in their broadest interpretation.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 6, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson in view of the applicant's disclosure.

Anderson discloses the device as claimed except for utilizing a vibration welding process to form the weld on the conveyor components. Anderson is silent on what type of weld process

Art Unit: 3651

he uses. It would have been an obvious matter of design choice as to the type of welding process used to join the conveyor modules. The applicant's disclosure (paragraph 15 of the specification) discusses the vibration welding process (by Branson Ultrasonics Corp.) as claimed, and then further states "But other welding technologies can be used accordingly with similar effect. Some examples include epoxies, electromagnetic welding, ultrasonic welding, orbital vibration welding, hot plate welding, and hot gas welding.". Therefore, it would have been obvious to assume that Anderson utilizes one of the above mentioned welding processes on his conveyor in place of the claimed vibration welding, since the applicant states that these other welding choices provide a similar effect or end result.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A Hess whose telephone number is 703-308-3428. The examiner can normally be reached on M-Thurs 5:30 - 4:00.
